

# Make a Spinner

## Materials:

Template, stapler and paper clips, coloured pencils.

## Procedure:

1. Print the template on a sheet of paper. Decorate the spinner with coloured pencils.
2. Cut and fold the spinner.
3. Put a staple or paper clip at the bottom of the spinner.
4. Hold the top of the spinner between your fingers and let it fall to the ground.
5. The shape of this spinner makes air move unevenly around the blades, creating a force that spins it. The weight of the staple or paper clip makes it more stable, so it falls vertically and spins faster.
6. Experiment with different sized spinners and weights.
